

Hello FCC,
Sattelite Radio has been an answer to prayer for me. Not only do I get more choice. I can pay for the service the way I choose, (which is not listtening to advertising). This technology is the way of the future. Anybody who oposes it should do so through competition not laws. I am oposed to NAB's petition 04-160, and I will vote accordingly. Keep your hands off my XM. I want traffic and weather. John Hampton
